

Same condition, different people: what each definition actually counts

Every ICD-10 code a definition counts, and the rules no code list can show

- counted in hospital or death records

also counted from primary care

not counted
- counts a drug purchase

counts a reimbursement right

must not meet another definition
- must be the most frequent code

control rule differs from the first

rule does not apply

		ICD-10 CODES										RULES				
												drug	reimb.	excl.	mode	control
Epilepsy		G40.0	G40.1	G40.2	G40.3	G40.4	G40.5	G40.6	G40.7	G40.8	G40.9					
	Any epilepsy															
	Focal															
	Focal, strict															
	Focal, mode															
	Generalized															
	Generalized, strict															
Sleep apnoea		F51.0	F51.1	F51.2	F51.3	F51.4	F51.5	F51.8	F51.9	G47.0	G47.1	G47.2	G47.3	G47.4	G47.8	G47.9
	Hospital records															
	+ primary care															
	Any sleep disorder															
Insomnia		F51.0	F51.1	F51.2	F51.3	F51.4	F51.5	F51.8	F51.9	G47.0						
	Insomnia (F51.0, G47.0)															
	Nonorganic sleep (F51)															
Constipation		K59.0	K59.1	K59.2	K59.3	K59.4	K59.8	K59.9								
	Constipation or laxatives															
	Functional bowel (K59)															
ADHD		F90.0	F90.1	F90.8	F90.9											
	F90.0															
	F90, strict controls															

READING THIS

6 of 27 definition pairs count exactly the same ICD-10 codes; all of them differ only in their rules. Primary care counts only in sleep apnoea + primary care; drug purchases only in constipation or laxatives. Tiles show ICD-10 codes only; the ICD-9 and ICD-8 parts of each definition are in the endpoint file.
