

Finnish and European LD scores rise and fall together

same SNPs, two reference populations

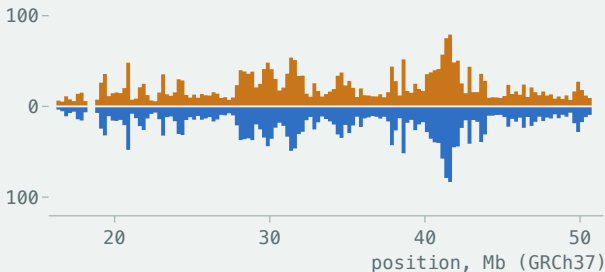

European, 1000 Genomes: above

Finnish, FinnGen R12: mirrored below

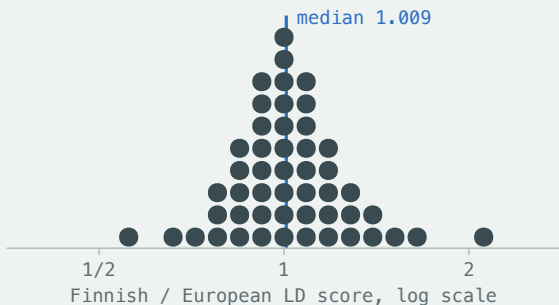

a Chromosome 21 mean LD score, 250 kb windows

b Chromosome 22 mean LD score, 250 kb windows

c SNP by SNP each dot: 2% of SNPs

READING THIS

33,436 SNPs; $r = 0.970$ between panels.
Median Finnish / European ratio 1.009;
48% of SNPs score lower in Finns.
