

1 One condition, 3 borders

sleep apnoea in FinnGen R12, cases

hospital records

56,885

+ primary care

62,722

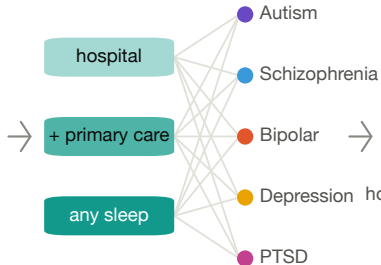

any sleep disorder

65,076

hospital-records length

2 Each meets 5 GWAS

LD score regression; 28 endpoints in all

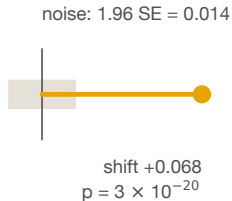

3 The correlation swings

depression with sleep apnoea

4 Bigger than its noise?

shared-block jackknife difference test

Checks beside the design

- published autism results reproduced
- codes mapped to SNOMED CT

- positive control: EHR vs clinical depression
- Finnish vs European LD

Data: FinnGen R12 summary statistics and endpoint definitions (28 endpoints); GWAS of autism, schizophrenia, bipolar disorder, depression (with EHR and clinical subsets) and PTSD; OMOP standard vocabularies (Athena).
